

time	title	Presenter		
9 – 9.30	Head of Conference	Dr. Abdolali Bsiri	start	12 January 2022
	The importance of biodiversity and balance in ecosystems	Dr. Vahid Poozesh		
9.30 - 10	Effects of human interventions on reproduction of forest species	Sajad Ghanbari	presentations	
10 – 10.30	Reduction of earthworm biodiversity by ecosystem change in the western margin of Hyrcanian forests	Atabak Rouhi Aminjan		
10.30 - 11	Bioaccumulation of heavy metals in aquatic animal's tissues	Fateme Nozhat		
11 – 11.30	Oak sprouting butterfly (<i>Tortrix viridana</i> L.) in the forests of western Iran	Fateme Soltanabadi		
11.30 - 12	Western-Eastern Palaearctic boundary: inferences from faunal distribution in Iran	Giovanni Forcina		
14 – 14.30	Biotic consequences of glacier retreat: community dynamics and ecosystem functioning	Francesco Ficetola		
14.30 - 15	Origin and Perspectives of Parthenogenetic Reproduction in Caucasian Rock Lizards	Marine Arakelyan		
15- 15.30	The effects of climate change on habitat suitability and distribution pattern of the highly endangered salamander, <i>Neurergus derjugini</i> Nesterov, 1916 (amphibian: salamander): from the last interglacial to the contemporary period	Rasoul Karamiani		
15.30 - 16	Pleistocene refugia in the southern Caspian Sea region; a comparison with caucasus region	Alireza Keikhosravi		
16 – 16.30	Transfer of heavy elements in the food chain and their biological magnification in the Pakhir Chay River	Amir Dehghani		
16.30 - 17	Application of morphological features in comparison with molecular features in assessing the genetic diversity of Iranian walnut populations	Melika Tabasi		
9 – 9.30	Newfound pollutants in aquatic ecosystems	Fateme Nozhat	presentations	13 January 2022
9.30 - 10	Isolation of a moving Salmonella from a specimen of golden eagle	Abdoreza Nabinejad		
10 – 10.30	Reflections on the philosophy, methodology and audience of environmental education in protected areas	Amir Ali Broumand		
10.30 - 11	Seasonal distribution pattern and species diversity of brown macroalgae (Phaeophyta) on the shores of Qeshm Island (Persian Gulf)	Maryam Akhondian		
11 – 11.30	Minimally invasive sampling (MIS) in genetic data from microsatellites and mononucleotide polymorphisms for genetic monitoring of wild populations	Amir reza Abed Elm Doost		
11.30 - 12	Species diversity of the order Ephemeroptera in Hamadan province	Mohtaram Krougdehi		

۱۲:۰۰ – ۱۲:۳۰	Investigation of temporal changes of plant biodiversity in abandoned lands of East Mashhad Cement Factory	Zohre Mojarad		
۱۲:۳۰ – ۱۲:۴۰			اختتامیه
